

ACVATIX™

## 2-port shutoff valves and 3-port changeover ball valves, PN 40, with externally threaded connection

VAG60..., VBG60..L, VBG60..T

**For use in heating, ventilation, and air conditioning plants as shutoff or changeover ball valve. In closed circuits.**

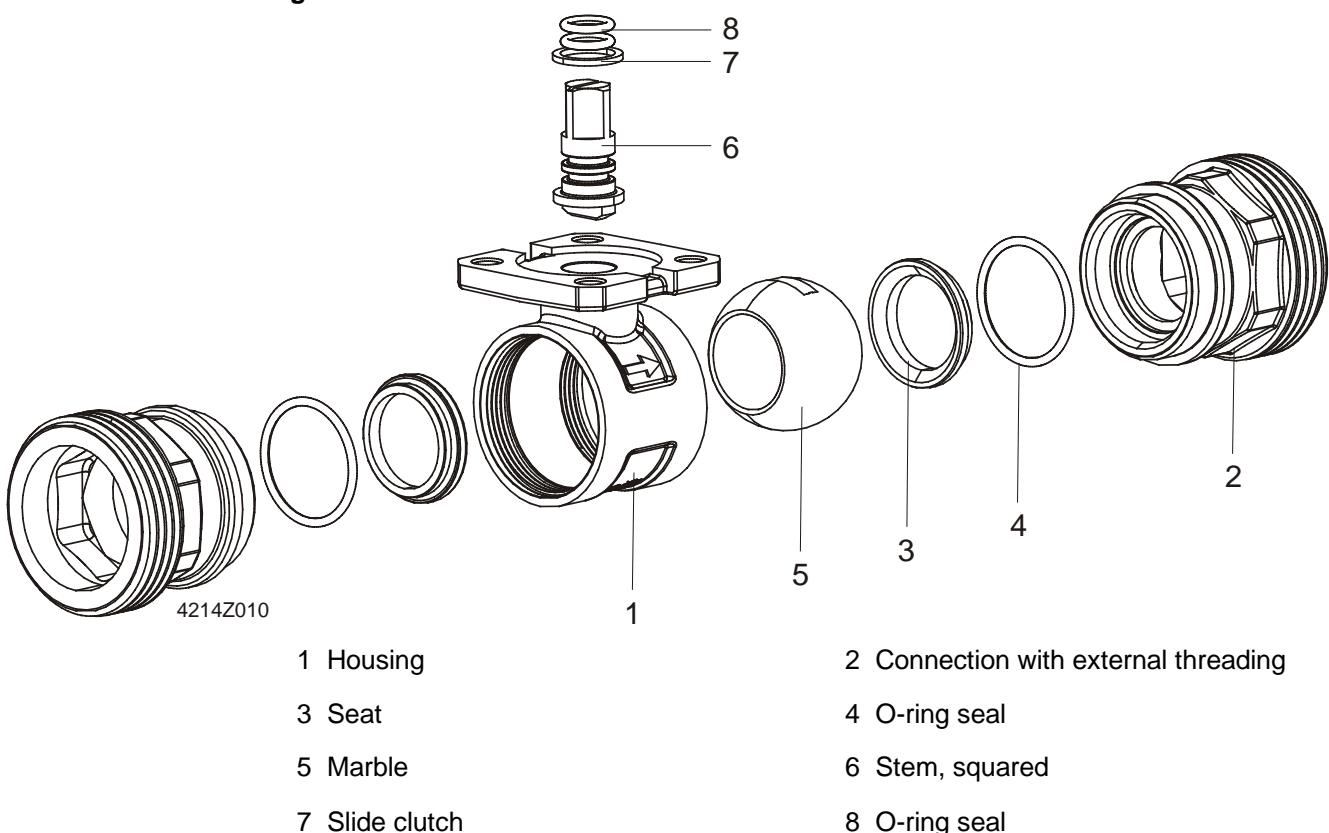

- Ball valve body made of brass CW602N (DZR)
- DN 15...50
- $k_{vs}$  5...96 m<sup>3</sup>/h
- Flat sealing, externally threaded connections G..B, as per ISO 228-1
- Fitting sets ALG.. with threaded connection
- Rotational angle 90°
- Can be combined with electromotoric rotary actuators GQD..9A, GMA..9E with spring return and GSD..9A, GDB..9E, GLB..9E without spring return
- For applications with auxiliary functions (e.g. auxiliary switchs, potentiometers, standard rotary actuators from the DAC product range can also be combined)

## Features

- Moderately priced:  
Optimized flow rates mean smaller ball valves can be selected. Low torque means you can combine them with small, less expensive rotary actuators.
- Long life expectancy:  
Maintenance-free construction, also thanks to low friction stem and polished ball made of chrome-plated DZR brass.
- Simple mounting:  
The brackets, pre-mounted on the actuators, means you can mount them on the ball valves without tools.

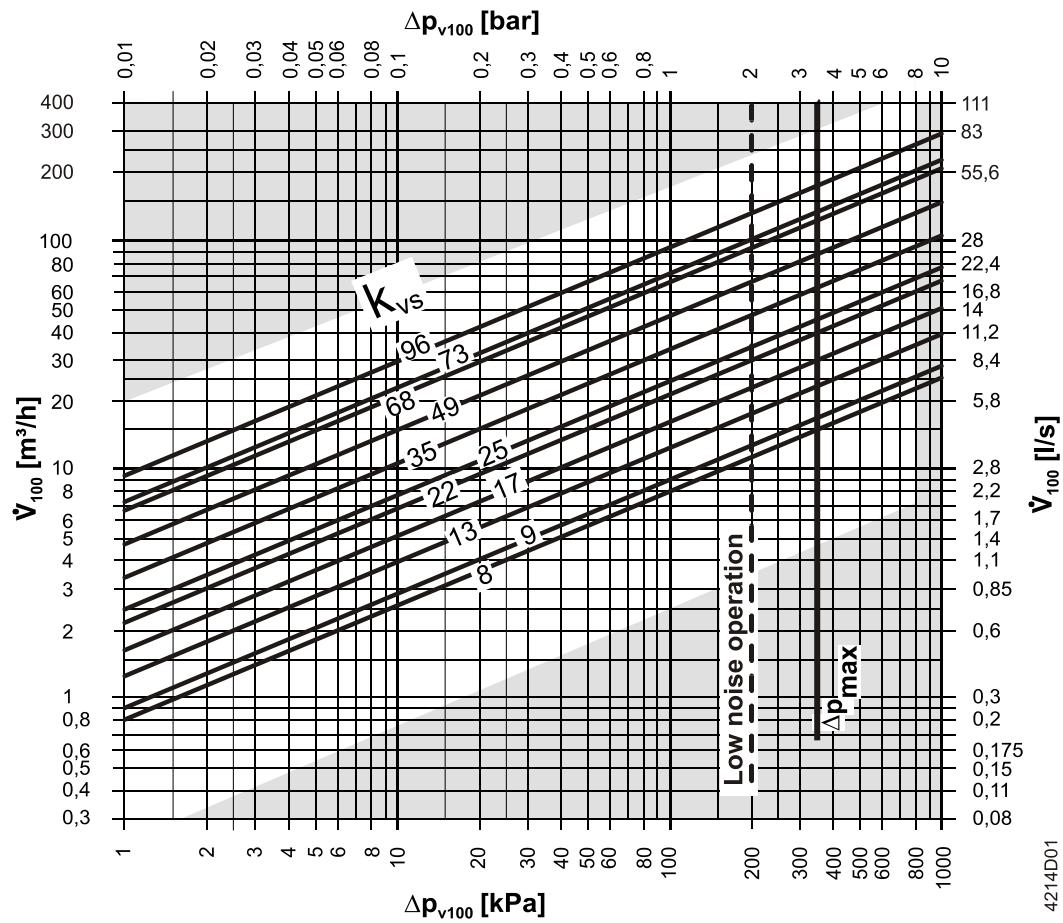

## Technical design

### Design

## Sizing

Flow diagram:

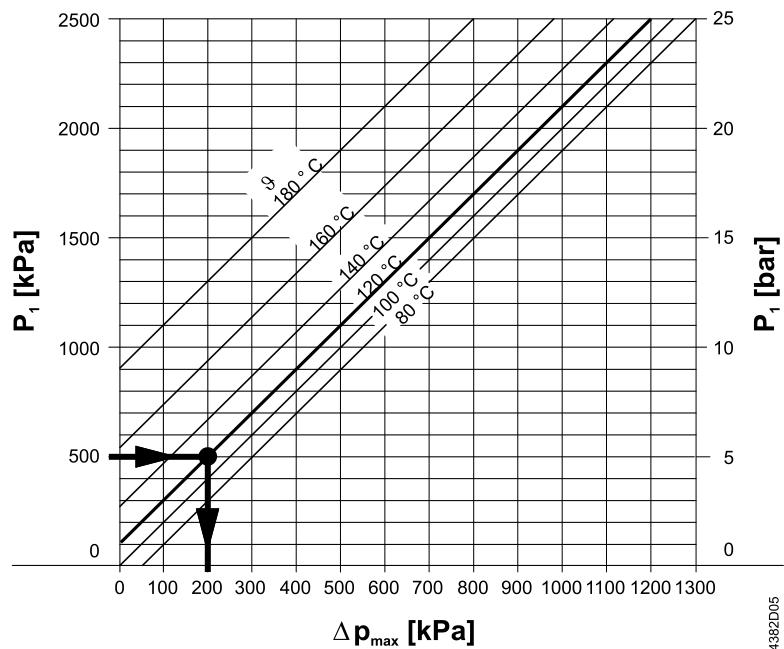

4214D01

- $\Delta p_{\max}$  for VAG60.. and VBG60.., for details, see table on equipment combinations
- $\Delta p_{\max}$  = Maximum permissible differential pressure over the ball valve, valid for the entire positioning range of the ball valve rotary actuator unit; if low noise operation is desired, we recommend a maximum permissible differential pressure of 200 kPa
- $\Delta p_{v100}$  = Differential pressure over the fully opened ball valve and over the control path at a volume flow  $V_{100}$
- $V_{100}$  = Volume flow through the fully opened ball valve
- 100 kPa = 1 bar  $\approx$  10 mWS
- 1 m<sup>3</sup>/h = 0.278 l/s water at 20 °C

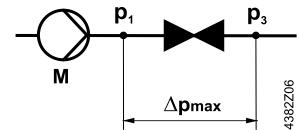

## Cavitation

Cavitation increases wear and tear of the ball and seat and results in unwanted noise. Cavitation can be prevented by not exceeding the differential pressures as per the flow diagram and maintaining the static pressures depicted below.

4382D06

- $\Delta p_{\max}$  = Differential pressure at a nearly closed ball valve to largely avoid cavitation
- $p_1$  = Static pressure at the ball valve inlet
- $P_3$  = Static pressure at the ball valve outlet
- M = Pump
- J = Water temperature

4382Z06

### Example with hot water:

Pressure  $p_1$  at ball valve inlet: 500 kPa (5 bar)

Water temperature: 120 °C

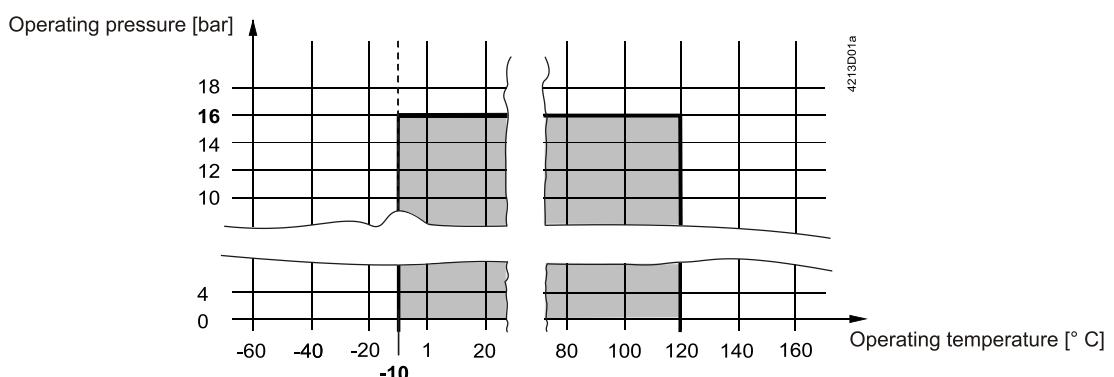

The above diagram clearly indicates that the maximum permissible differential pressure is  $\Delta p_{\max} \rightarrow 200$  kPa (2 bar) at a nearly closed ball valve.

### Note on chilled water applications:

To prevent cavitation in chilled water circuits, sufficient counter pressure must be supplied to the ball valve outlet, e.g. using an additional butterfly valve downstream of the ball valve. Maximum permissible differential pressure over the ball valve: See 80 °C curve in the above diagram.

## Operating pressure and operating temperature

Liquids:

Operating pressure and medium temperature per ISO 7005  
(Observe all local and applicable laws).

DN = Nominal size

$k_{vs}$  = Flow nominal value for chilled water (5...30 °C) through a fully opened ball valve at a differential pressure of 100 kPa (1 bar)

**Temperature adapter ALJ100**

	<b>DANGER</b>
<b>Hazard to life for the combination ALJ100 with GMA and ASK77.2!</b>	
Combining temperature adapter ALJ100 with ASK77.2 and rotary actuator GMA operated at AC 230 V ~ or rotary actuator GMA with auxiliary switch voltage AC 230 V ~ can result in life-threatening shocks if used inappropriate.	
<ul style="list-style-type: none"><li>• Never combine rotary actuator GMA operated at voltage of AC 230 V ~ with temperature adapter ALJ100.</li><li>• Never combine rotary actuator GMA with auxiliary switch voltage AC 230 V ~ with temperature adapter ALJ100.</li></ul>	

Type	Stock number	Description
ALJ100	S55846-Z115	Temperature adapter for ball valves

**Fittings**

Type	Stock number	Description
ALG..2	BPZALG..2	2 piece fittings set for 2-port valves, existing of 2 cap nuts, 2 insert nuts, and 2 flat seals
ALG..2B	S55846-Z1..	ALG..2B are fittings made of brass for media temperatures up to 100 °C
ALG..3	BPZ:ALG..3	3 piece fittings set for 3-port valves, existing of 3 cap nuts, 3 insert nuts, and 3 flat seals.
ALG..3B	S55846-Z1..	ALG..3B are fittings made of brass for media temperatures up to 100 °C

<sup>1)</sup> Actuator type: electromotoric

<sup>2)</sup> Actuator only approved for medium temperature  $> 0$  °C

<sup>3)</sup> 2-wire SPDT (single pole double throw)

<sup>4)</sup> open / close

## Ordering

Please indicate material, article type, order text, and quantity; example:

Material	Article type	Order text	Quantity
VAG60.25-22	VAG60.25-22	Open/close ball valve, externally threaded, 2-port	2
GLB131.9E	GLB131.9E	Electromotoric rotary actuator without spring return for ball valves	2

## Delivery

Ball valves, rotary actuators, and mounting kits are not assembled and are delivered in individual packaging.

## Applications with auxiliary functions

A standard actuator with corresponding functionality can be used if a ball valve application requires a rotary actuator with auxiliary functions (e.g. auxiliary switch or potentiometer). In this case, mounting kit ASK77.. is required in **addition** to the rotary actuator.

Follow the mounting instructions when mounting.

Rotary actuator	Options	Order text mounting kit
GMA..1E (with spring return)	Potentiometer, auxiliary switch	ASK77.2 Accessory Kit BV for GMA..1.9E
GDB..1E (without spring return)		ASK77.3 Accessory Kit BV for GDB..1.9E
GLB..1E (without spring return)		ASK77.3 Accessory Kit BV for GLB..1.9E
GQD..1A (with spring return)	Auxiliary switch	ASK77.5 Accessory Kit BV for GQD..1.9A
GSD..1A <sup>1)</sup> (without spring return)		ASK77.5 Accessory Kit BV for GSD..1.9A

<sup>1)</sup> GSD..4..1A are not compatible with ball valves.

**Safety**

	<p><b>DANGER</b></p> <p><b>There is a risk to operating personnel and device when working on the unit</b></p> <p>Failure to comply with these safety notes can result in personal injury and damage to property from pipe pressure, electrical voltage, or device in operation.</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Note the following when servicing a ball valve/rotary actuator:           <ul style="list-style-type: none"> <li>• Switch off both pump and operating voltage.</li> <li>• Close shutoff valves.</li> <li>• Release pressure in the pipes and allow them to cool down completely.</li> <li>• Disconnect electrical connections from the terminals as needed.</li> <li>• The rotary actuator must be properly installed prior to recommissioning the ball valve.</li> </ul> </li> </ul>
	<p><b>CAUTION</b></p> <p><b>National safety regulations</b></p> <p>Failure to comply with national safety regulations may result in personal injury and property damage.</p> <ul style="list-style-type: none"> <li>• Observe national provisions and comply with the appropriate safety regulations.</li> </ul>

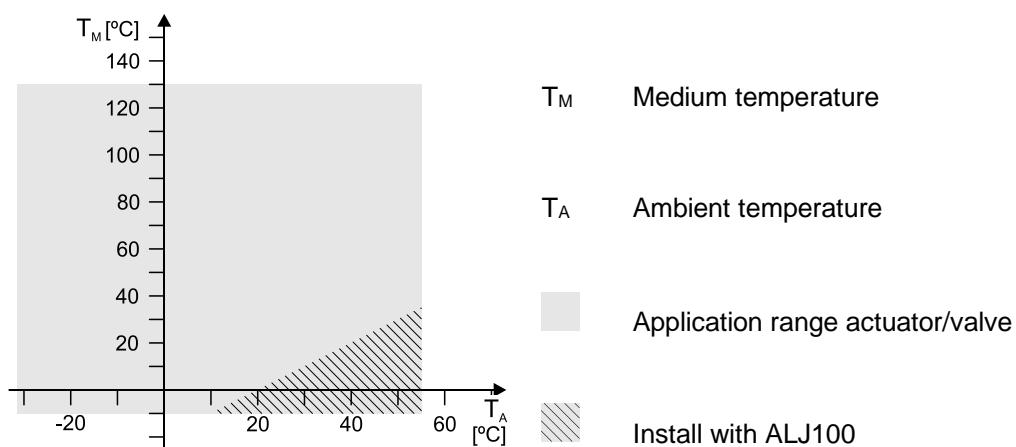

**Engineering**

We recommend installing the ball valve with spring return since temperatures are lower on heating plants which increases the lifespan of the sealing gland on the stem.

Ensure there is no cavitation (see section Technical design [→ 2]).

A filter must be installed upstream of the ball valve to increase functional safety.

We recommend using temperature adapter ALJ100 in locations exposed to condensation to protect the actuator. Lubricate the adapter axle with silicon grease at medium temperatures  $\leq 0^{\circ}\text{C}$ .

Only use GDB.., GDD.., GSD.. and GQD.. actuators at medium temperatures  $> 0^{\circ}\text{C}$ .

## Permissible media

Using the ball valve in combination with potassium formate-based media, such as Hycool or Temper, can result in leakage over the stem to the outside. The reason is the high level of penetration at low surface tension of media based on potassium formate.

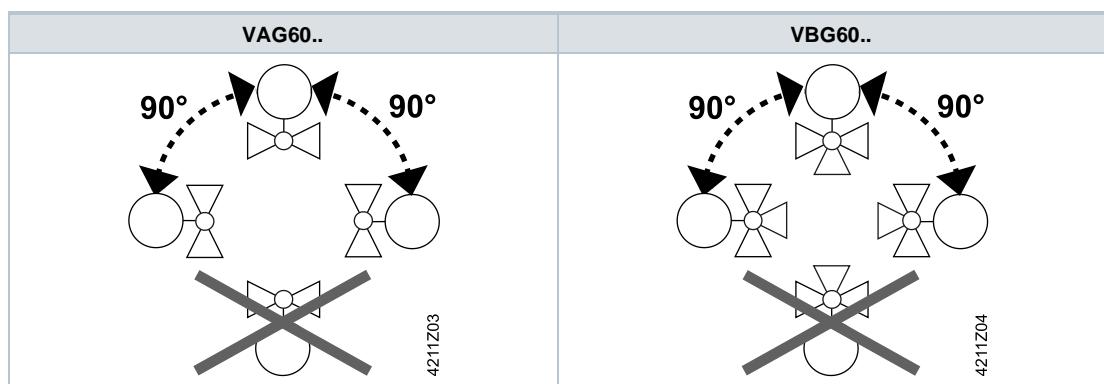

Siemens rejects any and all liability for damages or consequential damages resulting from the use of this media in combination with our ball valves.

## Mounting

It is easy to assemble the ball valve and rotary actuator; it can be done at the construction site. No special tools or settings required.

Ball valve VAG60.. / VBG60.. is supplied together with mounting instructions M4214 (7431909230).

## Mounting position

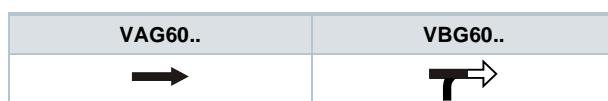

## Pipe connection

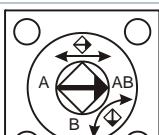

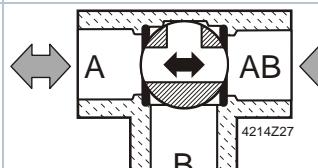

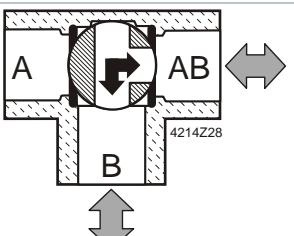

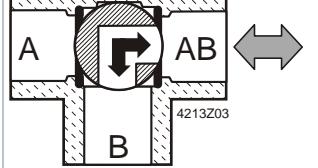

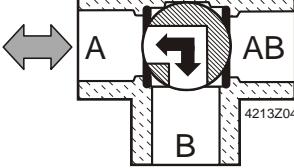

Avoid leakage:

- Install fittings as per ISO 7-1. Ball valves (internal threading) = „Rp“; Piping (external threading) = „R“.
- Do not use too much hemp or PTFE tape.
- Do not tighten pipe threading to the very end.
- Place the pliers/wrench on the ball valve union nut that is closer to the pipe to be tightened or loosened.

## Flow direction

Make sure that the valve is mounted in the proper flow direction. A symbol is applied to the ball valve body:

Ball valve	Laser marking	Position as delivered	90 ° turned (clockwise)
VAG60.. 2-port shut-off ball valve	-	 4213Z01	 4213Z02
VBG60..T 3-port change-over ball valve, T-shaped	 4214Z24	 4214Z27	 4214Z28
		$A - AB = 100\%$ $B - AB = 0\%$	$A - AB = 0\%$ $B - AB = 100\%$
VBG60..L 3-port change-over ball valve, L-shaped	 4213Z2	 4213Z03	 4213Z04
		$B - AB (AB - B) = 100\%$	$A - B (B - A) = 100\%$

## Maintenance

Ball valves VAG60.. and VBG60.. are maintenance free.

## Disposal

The valve should not be disposed of as domestic garbage.

- Special treatment for individual components may be required by law or make ecological sense.
- Comply with all local and currently applicable laws and regulations.

## Warranty

Technical data on specific applications are valid only together with Siemens products listed under "Equipment combinations". Siemens rejects any and all warranties in the event that third-party products are used.
